Help Your Members

Break the Grip of Pain and Enjoy Life Again!

This evidence-based Chronic Pain Self-Management Program demonstrates replicable results by providing tools proven to be successful in helping individuals manage their chronic pain.

Your members will complete the workshop with strategies and confidence to take back control of their lives from chronic pain.

The workshop:

- Meets for 2 1/2 hours each week for six weeks
- · Can be held in your practice location, office, senior center, or other community site
- Lay-led program. Many of our instructors have personal experience with the conditions they focus on
- Supported by evidence-based outcome studies

Your members will learn how to:

- · Learn chronic pain coping skills
- · Practice relaxation and improve their sleep
- · Learn gentle movement exercises
- · Balance activity and rest
- · Manage difficult emotions and stress
- · Develop healthy eating habits
- Improve communication with healthcare providers
- Share the joy of their successes and enjoy the support of others like themselves

The studies behind the Chronic Pain workshop:

This workshop helped individuals be more confident that they can do things outside of seeing their doctor or taking medication to reduce the effect pain has on their everyday lives. Participants have shown improved confidence in keeping certain symptoms – fatigue, physical discomfort, and emotional stress – from interfering with the things they want to do. Study results:

(376) Impact of the Harborview Chronic Pain Self-Management Program on participants' quality of life, confidence and pain experience http://bit.ly/2XJYgl9

"Participants showed significant improvements on pain, disability, catastrophizing, depression, anxiety, and health worry..." Study results: A prospective evaluation of the Chronic Pain Self-Management Programme in a Danish population of chronic pain members. http://bit.ly/2GbWcHX

Self-management interventions are effective methods to improve pain and health outcomes. Study results:
