

Help Your Members

Better Control Their Type 2 Diabetes

This evidence-based Diabetes Self-Management Program demonstrates replicable results by providing tools proven to be successful in helping individuals manage their diabetes.

Your members will complete the workshop with strategies and confidence to take back control of their lives from diabetes.

The workshop:

- Lay-led program. Many of our instructors have personal experience with the conditions they focus on
- Supported by evidence-based outcome studies

Your members will learn how to:

- Understand what their blood sugar level is telling them
- Make their diet work FOR them, not against them
- Manage stress and difficult emotions
- Exercise to take care of their health
- Talk with their doctor about their symptoms
- Set goals for their health - and stick to them!

The studies behind the workshop:

“Improvements noted at 6 months were maintained or amplified at 1 year.” Study results:

[A Diabetes Self-Management Program: 12-Month Outcome Sustainability From a Nonreinforced Pragmatic Trial](http://bit.ly/2XlmbkS)
<http://bit.ly/2XlmbkS>

Follow-up questionnaires showed statistically significant improvement in 6 of 7 health indicators and 7 of 7 behaviors. The program appears effective in improving diabetes management.” Study results:
